

Data Communication and Networking Syllabus

Course Description:

This course introduces the fundamental concepts of data communication and computer networks. Topics include physical layer transmission, data link layer protocols, medium access control, routing algorithms (IP), congestion control, transport protocols (TCP/UDP), and application layer

Syllabus Concepts to Study:

1. Physical Layer and Signal Encoding
2. Data Link Layer and Error Correction
3. Network Layer Protocols and IP Routing
4. Transport Layer TCP UDP Flow Control
5. Application Layer DNS HTTP and Security
